Manlift Operator Certification Calgary

Manlift Operator Certification Calgary - We offer a scissor platform and aerial lift certification and training to empower the one training with the knowledge and general understanding of the efficient and safe operation of "Power Operated Mobile Work Platforms," in accordance to the existing regulations in the industry. Upon successful completion of training, the participants would be able to understand and recognize particular health and safety related hazards associated with using aerial and scissor lifts.

There are various affiliated places in your district providing Manlift Operator Certification Programs. Those training are provided with in-depth instruction on safe use and regulations together with extensive hands-on training. The knowledge and skill level of every person training is assessed and people who could demonstrate a satisfactory level of operational ability will be given Operator Certification cards and employee documentation.

Theory Training
The trainer guides trainees through a comprehensive and interactive review in the theory training. The operator workbook is studied which covers all applicable regulations. Other subject matters such as various equipment kinds including different sizes and associated applications, safe operating procedures, pre-use checks and general work place safety are individually explored.

Theory Evaluation
The evaluation of the theory parts starts with a written exam, which focuses on the course concepts which was covered in the reference manual. Exams are graded and returned to the trainee. Then the tests are reviewed to guarantee understanding and a score of at least 70 percent is needed so as to pass this portion of the training.

Practical Training
The practical training is covered in the hands-on portion. It is here that the ones training are shown the safe operating measures, like for example the parking and shutdown measures and the pre-use inspection procedures. Each one training has the chance to operate the machine and practice the skills they learned in Theory Training under the helpful eye of the course trainer in a setting that is safety controlled.

Practical Evaluation
The assessment of the practical portion is where the trainee is evaluated as to whether they have the minimum level of skill. Those training are individually tested on their skills using the equipment in a somewhat difficult program environment. After the evaluation is complete, the ones training are de-briefed and given the opportunity to address whichever problems they may have about any portion of the program. Each and every employer of a successful trainee will be given the official records and documents shortly after the course has been completed.
