

Counterbalance Forklift License Calgary

Counterbalance Forklift License Calgary - Forklifts, when operated by completely trained employees, are a major advantage to companies. We provide a comprehensive training program including all factors of operating a powered lift machinery. Counterbalance forklift training provides operators of forklifts with the knowledge and practical skills needed to operate forklifts efficiently and safely. The program provides a combination of classroom theory, participant observation and hands-on training within a warehouse-type environment. Training can be on site and/or customized.

The course comprises the fundamentals of powered lift trucks, like for example rules and regulations, parts, load centres and factors affecting stability. General operating procedures are taught, like for example startup, circle check, forward/reverse on level ground, shutdown, and operating around other individuals. Load handling topics include load pickup and placement, selection of loads, load security and integrity, loading and off-loading trailers. People participating will learn operational maintenance procedures, such as recharging and refueling. Safety issues within the workplace would be talked about. Participants would know the environmental conditions affecting lift truck performance and be able to identify potential dangers. Advanced training on propane handling could be included.

Both employees and employers can deal with severe penalties if industry and national guidelines are not followed in the operation of forklifts. Workers who operate a reach truck or forklift ought to be knowledgeable regarding the guidelines concerning their safe operation. Training is recommended for any person applying for work that requires forklift operation.

Inside our small personalized classes, we offer both hands-on training and in-class theory. The options for personalized training will comprise entry level or refresher courses.
