Aerial hoists are also used in construction, transporting personnel safely up and down the sides of multi-level construction sites.

Scissor lifts are quite frequently utilized by service businesses as the perfect approach to safely enable workers to fix and work on cables and wires attached to poles. Telephone, cable television and power corporations have relied on the efficiency of this style of boom lift for years.

Knuckle boom lift trucks are designed to be utilized in rough terrain locales where the need to be able to reverse course is necessary.
